

Five Habits of Critical Thinking

Pause, examine the claim, and make your own decision.

- 01 IS IT ACTUALLY RIGHT?**
What evidence supports the claim? Does that evidence support the conclusion?
 - 02 DO I KNOW ENOUGH TO JUDGE?**
Recognize where your knowledge ends. Find out what you need to understand before deciding.
 - 03 WHAT'S MISSING?**
Look for missing information and other explanations. Would a different fact change the conclusion?
 - 04 WHY AM I CONVINCED?**
Is it the evidence, the confident wording, or what you want to believe?
 - 05 WHAT'S MY CALL?**
Decide what to believe or do. You can change your mind when you learn more.
-

USE THESE BEYOND AI

These questions work on anything you read or hear. AI can help you look for weaknesses in an argument, but you still judge whether its answer holds up.

 **Good thinking in, sharper output.**
