

Using AI in School

Own what you submit and be clear about how it was made.

01 **START WITH THE ASSIGNMENT RULES**

AI help may be allowed in one class and prohibited in another. Check the policy and ask your teacher when it is unclear. Disclose AI use as required.

02 **USE AI TO SUPPORT LEARNING**

When permitted, use it to practice, ask for explanations, get feedback, or improve work you understand and created. Do not submit AI-generated work as your own or use AI when the assignment prohibits it.

03 **UNDERSTAND IT**

Be able to explain the ideas and choices in your work yourself. If you cannot, keep learning before you submit.

04 **SHOW YOUR PROCESS**

Keep drafts, sources, and relevant AI conversations so you can show how the work developed.

05 **EXPLAIN AI'S ROLE**

Clearly say what you did and how AI helped. Adapt this example truthfully and follow your teacher's disclosure requirements:

"I wrote the draft and used AI to identify unclear passages. I chose and made the revisions and checked the facts against my sources."

If your name is on the work, you own how it was made.
