

Welcome

WHY GO DEEPER?

Everyone has AI.
Most just press go.
Few understand it.
Be Smarter Than the Tool.

Welcome. You're about to learn how the most powerful tool of your lifetime actually works. Not five quick tips. Not yesterday's hype. The real machinery.

HOW TO TAKE THE COURSE

Two ways. Same material. Your choice.

READ

Read the full lesson.

Move through the ideas at your own pace.

WATCH

Press play for the video.

Learn the same material in a shorter format.

Either way, finish the activity before moving to the next lesson.

WHY WE BUILT THIS

We're Luke and Nate, and yeah, we're still in high school. This started at our kitchen table. AI is in every headline now, and it's going to be in every career, including ours. We're the ones who'll be applying for those jobs, so we'd rather understand it now than scramble to catch up later.

We went looking for something good to learn from, but most of it was shallow, focused on tools, or already out of date. So we built our own.

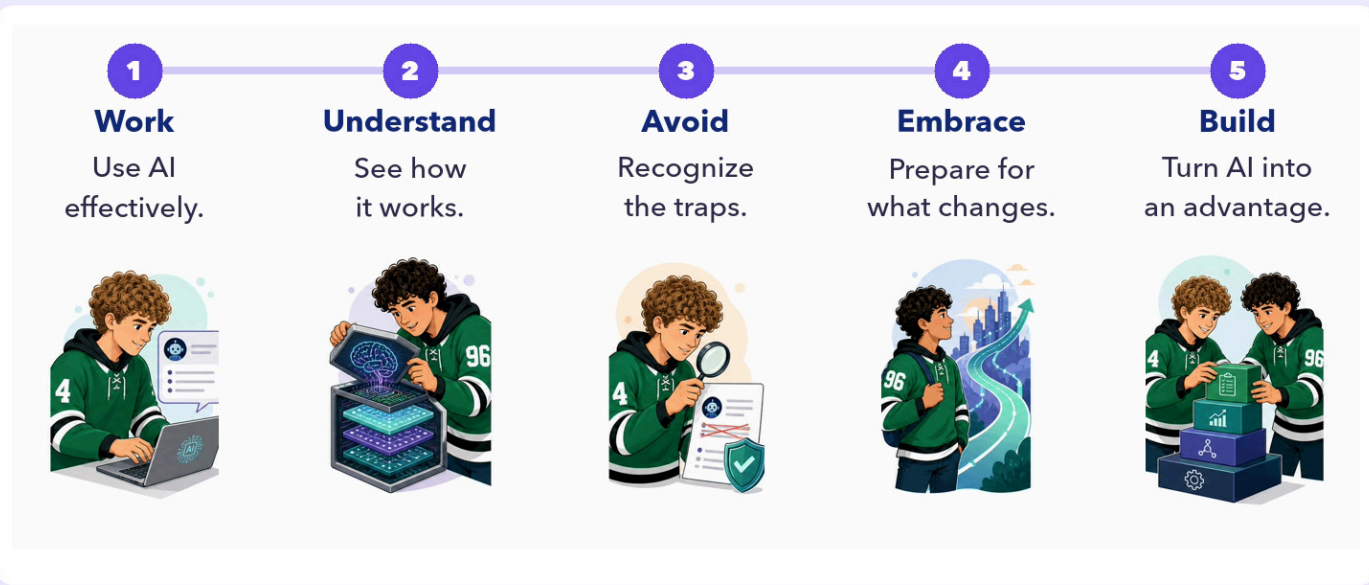

Building it is what showed us the bigger point. AI is already everywhere in your life, and it'll define the career you haven't started yet.

And here's the part nobody tells you: the better AI gets, the more it pays to be the person who actually understands it. The gap between people who get how it works and people who just type into the box is only going to get wider, and **which side you land on is up to you**. That edge has a name, and it's the most important AI skill there is: **Be Smarter Than the Tool**.

You'll even catch us in a few of the examples later, usually wearing the jerseys of the greatest hockey team in the world.

Here's your path.

Start with the tool. Finish with what you can do.

TOOLS NEEDED

Your course toolkit

01

A computer

BEST FOR THE LABS

Use a laptop or desktop computer for hands-on activities.

02

ChatGPT for Teens

FREE ACCOUNT

Your main lab tool. Ages 13 to 17 are automatically placed in the teen experience.

03

Google account

FREE ACCOUNT

You'll use it to create a Gemini Notebook.

Be Smarter Than the Tool.

The most important AI skill there is.
