

Short answer: no, not the way you do.

We call it Artificial Intelligence, not Artificial Thinking. That was picked on purpose. Something can act intelligent, finish your sentence, explain a poem, without understanding a single thing it just said.

1 People outside slide notes in Chinese under the door.

2 Inside, the person can't read it. They look up the symbols on a giant chart.

3 They choose the most likely next symbol and slide it back.

To anyone outside, it looks like fluent Chinese conversation.

你好嗎？

我很好，謝謝！

CHINESE SYMBOLS → MOST LIKELY NEXT SYMBOL	
IF YOU SEE:	THE NEXT SYMBOL IS MOST LIKELY:
你	好 叫 是 们 ...
好	嗎 吧 的 呀 ...
嗎	? 呢 吧 , ...
...	...

ALL POSSIBLE SYMBOLS

RULES ONLY

I DON'T UNDERSTAND CHINESE

你好嗎？

→ 我叫小明

That's AI. It arranges symbols brilliantly and understands none of them. You get a perfect-looking answer with no real understanding behind it.

Can't tell when it's making things up

Once you see that, its weird moments make sense.
